**SUMMARY**

**AETERE'S**

**Subtle energies**

## Life Promoting Technology

The theories and laws of the "subtle" energies are collected in numerous scientific studies by famous scientists and Nobel laureates.

Quantum physics tells us today that what we see in the "real" world has nothing to do with the sub-atomic world. Every subject, every living being and even the vacuum is imbued with huge amounts of subtle energy.

In polluted cities, in the office full of computers, in geopathic homes, the balance and harmonization of the many energy forms is very poor. That's the reason why we can feel stress, discomfort, anxiety and energy waste.

**A real Habitat Science will be a real preventive medicine, able to create ideal energy balance conditions.**

# AETERE'S™

## Life Promoting Technology

AETERE'S™ is a leading Italian company deeply involved into Smart Energy Technologies and major Biocompatibility and Environmental Re-harmonization projects. We deal both with domestic business and industrial facilities from small to large volumes, including common environments like hotels, theatres and concert halls.

The company operates in the value of high quality and absolute mechanical and electrical reliability of its products, adopting materials and components of extreme quality.

Aetere's It is also the sole agent in Italy of the Swiss environmental technology **Ojas Energetic Building Biology**.

### Who we are What we do

SOLS SWISS  
OPTIMAL  
LIVING  
SOCIETY

Ojas®

We have developed a **METHODOLOGY** and a **TECHNOLOGY** to make spaces healthy, biocompatibles and life-promoting ones.

We focus our interventions on the analysis and solution of several issues, products of:

**Enviromental Stress**

**Attacks by electromagnetic radiation**

**Magneto-telluric Geopathies**

The tools deployment ensures the elimination or the attenuation of the energy elements that are no longer able to sustain a favorable regenerating environment. The tools restore the energy and harmony circulation within the spaces, indispensable conditions to the well-being of their inhabitants.

### Who we are What we do

#### Field of action

An EBB/BRA operator does not confine his/her scope to simply identify the disturbing phenomena, but is able to interpret the collected data within a much broader functional framework of the surrounding environment. Studying the enviroments from many different points of view is the best way to comprehend and appreciate the subtle energetic flow.

**AETERE'S**

Who we are What we do

EBB and BRA

Life Promoting Technology

**ENERGETIC BUILDING BIOLOGY  
BIOCOMPATIBILITY AND  
ENVIRONMENTAL RE-HARMONIZATION**

EBB and BRA are part of a modern Habitat science that combines the latest bioenergetic and quantum physics discoveries together with the Vastu traditional knowledge, the ancient architecture and the environmental preventive medicine. **An EBB and BRA operator discovers and solves energetic environmental phenomena (Subtle and not) that are not biocompatibles.** He/she makes use of electronic instruments capable of measuring many artificial electromagnetic fields. The biophysical measurements always complement a good instrumental survey to confirm the different radiation sources (groundwater, faults, soil fractures, Hartmann Grid, Curry Grid, big orthogonal and diagonal grid, etc.) that are not clearly detected by electronic means. During the sensible survey It is possible to use manual perception or the Lecher Antenna, a very precise graduated instrument capable to test the majority of the environmental energetic frequencies.

**Personal** subtle harmonizing devices

PHI

PHIwater™

**Enviromental** subtle harmonizing devices

Clearlux

Domus

E-spira

Orpheus

### Personal Harmonizing Instrument

The **PHI** is, literally, an “harmonizing” instrument in the true sense of the word! It has the purpose to create an harmony, a balance between the user energetic state and the various subtle enviromental energetic interferences sources which interacts with him **all the time**.

### PHI $\Phi$ : Subtle Toroidal Technology

An internal battery powered electric pulse activates the PHI, generating a three phase Toroidal Flow:

1. INPUT: environmental entropic energies/congestions absorption.
2. HARMONIZATION: incoming energy stream sorted out via ARC technology. Complex Re-harmonization Algorithms processed by the internal circuit.
3. OUTPUT: powerful **Life Promoting Energies** stream irradiation

### PHI Φ

#### Size and weight:

Diameter: 1.76 inch / 44.8mm

Depth: 0.52 inch / 13mm

Weight: 1.5 oz / 44g

Material: Aluminium-Copper alloy; copper is present in a 5-6% ratio, highly contributing to the excellent subtle-energies propagation.

#### Precautions for use

Inside the instrument it is housed a CR1612 lithium-ion battery; this battery has to be placed with the negative side (-) toward the metal holder (see the photo on the following page).

Lithium batteries have not to be tampered with, disposed in fire (they could explode!) or placed in ordinary municipal waste, but disposed of in accordance with current regulations.

### Maintenance

### Battery replacement

The toroidal flow is activated by means of an electromagnetic pulse provided by a lithium battery placed inside, see left. This battery must be replaced every two years to maintain the instrument in perfect efficiency.

To replace the battery, simply rotate counter clockwise the **A section** keeping the **B section** firmly in place. A little **dot** inside is the reference point to match the halves so to easily close the instrument.

### PHIwater™

The PHIwater™ is, by all means, an instrument “dedicated” to Water: from drinkable one to the biologic water-matrix of the cells. Any metabolic process necessary to life occurs into the water medium.

The ARC processed by the internal circuit has been engineered and built in order to harmonize the fluidic component and to enrich water of **Life Promoting Informations.**

### PHIwater™ Crystallization Test

VISION LAB®  
ENERGY QUALITY RESEARCH

Common tap water. Images obtained by means of VisionLab SAT extraction diagnostic process

Same water, dynamized after **PHIwater™** processing. Images obtained by means of VisionLab SAT extraction diagnostic process

### Clearlux

The **Clearlux** is an instrument specifically devoted to disperse and condense the inflamed electromagnetic ether. Its action, both cleanse the jammed elements along the electric line and counters all subtle forms of electromagnetic congestion that attack the living environments.

Wired to the mains line, following precise geometries and technical surveys, the **Clearlux** is able to reach any room in the surrounding environment with an extremely low power loss and an extremely high work load.

ÆTERE'S INSIDE: digitized informations to condense and dissolve the disrupted electromagnetic ether

### Domus

The **Domus** is a digital resonance and condensing chamber to wire to the electric line.

**It is an instrument specifically devoted to condense the interferences of telluric origin.**

Wired to the mains line, following precise geometries and technical surveys, the **Domus** is able to reach any room in the surrounding environment with an extremely low power loss and an extremely high work load.

**ÆTERE'S INSIDE:** digitized informations to condense and dissolve the disrupted telluric energies

**AETERE'S**

# Life Promoting Technology

## E-spira

Small up to the point to fit in any free electric socket, or beside any audio/video gear, able to silence any HVAC or household appliance.

Nowstanding the small form factor, the *e-Spira* is able to effectively locally clean the electric line both from harmonics and spikes, keeping "in scale" the same fundamental features of its bigger brothers.

Slightly larger than the plug that hosts it, there is no limit to the number of e-Spira devices that can be usefully installed in an environment. It has to be located in the same or in the side plug that powers household gear, so to intercept their noises before they are transmitted to the electric network and then into the environment: refrigerator, air conditioner, TV, washing machine, microwave oven, PC, WiFi router, laser printer etc. they are all environmental pollution agents.

Offered only in three pieces set.

**AETERE'S**

**Orpheus**

**Life Promoting Technology**

The **ORPHEUS** is a passive mains filter born out of the need to condense any electromagnetic interference and noise, both subtle and dense, allowing the wired electronics, particularly the audio/video ones, to perform at the full strength of their top capabilities.

The ORPHEUS is also advisable in those high electromagnetic polluted environments like offices, where the crowding of electronic machinery (PCs, fax machines, printers, halogen lamps, low-consumption lamps, air conditioners etc.) concurs to sudden malfunctions or even black outs of the electronics themselves. In these situations the ORPHEUS is advisable not only for individual EDP units but also as a protection for dedicated servers, routers, gateways, analog, ISDN or ADSL modems, switchers.

ORPHEUS units can be connected to: DVD players, TV sets, video projectors, multi-channel setups, Personal Computers, monitors, LCD or plasma panels, mixers and any other consumer or pro audio-video item requiring a high protection against pulses, current peaks and power supply network harmonics. Depending on mains line network conditions, the use of the ORPHEUS can bring benefits like a deeper contrast and saturation of colors along with a better clearness of the white to TV sets, monitors, projectors (and Video setups in the broader sense). A full elimination or attenuation of snow, flickering and a better detail resolution are common outcomes as well.

The ORPHEUS has also a direct influence over the electromagnetic fields themselves.

The environment where we live and work plays a key role to establish the performance and efficiency level of the energetic biophysical system. In some cases the environmental energies are able to improve our mental/physical state, while in other cases the energetic interferences may interfere and block it.

We are developing an ENVIRONMENTAL SCIENCE, what we call Energetic Building Biology. Our target is to re-create a **RARE PLACE**.

RARE PLACE is an innovative Research/Operation project, born to solve the problem of "environmental energetic quality"

**Research & Experimentation**

Research & Experimentation

Sick Building Syndrome

# ENVIRONMENT QUALITY AND LIFE QUALITY

In 1984, the World Health Organization reported that up to 30% of newly-built buildings might cause acute illness in individuals residing in them for long periods of time. They called this phenomenon «Sick Building Syndrome» (SBS).

Today it is even worse. Our energetic level, state, and performance, dictate the results that we get from our everyday actions. The environment that we live in plays a big factor in determining at what level our body performs. It can either support our state of mind and being, or it can harm it and make things worse.

### Research & Experimentation

SBS: Symptoms

## SICK BUILDING SYNDROME/ EFFECTS

The affected people complain of general symptoms like: nausea, headache, dizziness, fatigue, concentration difficulties, irritation of eye, nose & throat.

**The Sick Building Syndrome** can also manifest often in homes. For that reason the Enviromental Technology offers solutions including private spaces.

Our energetic level, state, and performance, dictate the results that we get from our everyday actions. The environment that we live in, plays a big factor in determining at what level our body performs. It can either support our state of mind and being, or it can harm it and make things worse.

Research & Experimentation

Solutions

# OFFICES PUBLIC SPACES PRIVATE ENVIRONMENTS

Several european countries have started medical research protocols to study the **Sick Building Syndrome**. The future of medicine is oriented more and more towards preventive and enviromental medicine.

“SBS” is a problem that can be corrected and solved.

**Rare Place** is committed to prevent pollution through effective and efficient use of:

- Innovative research
- Precise enviromental analysis
- Careful installation methodology

## SCIENTIFIC EVIDENCES OF THE BRA INSTALLATION

Through the valuable research and experimentation work of skilled specialists, Aetere's has identified four evaluation tests to collect scientific evidence data before and after instruments installation.

**BAROPODOMETRIC test:** this stabilometric test define the interference between geopathies and human postural system. The various experimental tests showed and demonstrated the efficiency of the BRA instrumental installation. Aetere's devices were able to completely eliminate enviromental energetic congestions responsables for important postural perturbations againsts the examined subjects.

**BIOFEEDBACK HEART RATE VARIABILITY:** HRV is a scientific technique used to measure and analyze the heart rate variability and it's able to value the activity of Autonomic Nervous System and the balance between the Parasympathetic and Sympathetic nervous system activation.

**NETWORK ANALYZER:** it's a device that is able to clearly show noise, spikes and harmonics present in the electric network before and after instruments installation.

**BIOELECTRICAL IMPEDANCE ANALYSIS:** this test is able to diagnose the states of water retention, dehydration, malabsorption and difficulty in muscle recovery connected with geopathies and electromagnetic interferences. In the same time, the BIA test demonstrates the BRA instrumental installation efficiency in restoring a healthier vitality curve, previously compromised by enviromental energetic congestions.

## POST-INSTALLATION FEEDBACKS

Tipically, it is possible to appreciate an array of sensations that after an enviromental reharmonization installation will keep in a steady state during time. Some of them occur immediately:

**AIR IONIZATION EASY BREATHING**

**ENERGY CIRCULATION, COOL BREEZE PERCEPTION**

Some others occur after the installation achieves the top of the efficiency:

**SENSE OF WELL BEING, RELAXING BRAIN FREQUENCY BALANCE**

**HEALTHY SLEEP, SENSE OF LESS TIREDNESS, MINOR PSYCO-PHISICAL STRESS**

### SOLS Certification: ADDED VALUE

SOLS develops research projects to improve the energetic quality of life and the environment in which we live, proposing and certifying a whole series of new technologies defined **NEW SCIENCE TECHNOLOGIES**.

With this aim, SOLS scientific department researches the environmental conditions and the ideal energy potentials to achieve an optimal level of psychological well-being, devoting its activities toward the development of a new cultural paradigm of environmental health defined **ENVIRONMENTAL PREVENTIVE HEALTH CARE**.
